

Team Id	PNT2022TMID35084
Project Name	Analytics for Hospitals Health-Care Data
Maximum Marks	2 Marks

## Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.no.	Parameter	Description
1.	Problem statement (problem to be solved)	<ul style="list-style-type: none"> <li>EHR data matched patient-reported data in 23.5 percent of records in a study at an ophthalmology practice.</li> <li>Patients' EHR data didnot agree in any way when they reported having three or more eye health complaints.</li> </ul>
2.	Idea/Solution description	<ul style="list-style-type: none"> <li>Predictive analytics can create patient journeydashboards and disease trajectories that can lead to effective and result-driven healthcare.</li> <li>It improves treatment delivery, cuts cost, improves efficiencies, and so on.</li> </ul>
3.	Novelty/Uniqueness	<ul style="list-style-type: none"> <li>Healthcare data frequently resides in several locations from various departments, such as radiology or pharmacy, to various source system, such as HR software.</li> <li>The organization as a whole contributes to the data.</li> <li>The data becomes accession and enable when it is combined into a single, central system, such as an enterprise data warehouse(EDW).</li> </ul>
4.	Social Impact / Customer Satisfaction	<ul style="list-style-type: none"> <li>Enhance diagnosis,</li> <li>Improved medical treatment,</li> <li>Improved health results,</li> <li>Improved relationships with patients,</li> <li>More positive health indicators.</li> </ul>
5.	Business Model (Revenues Model)	<ul style="list-style-type: none"> <li>The two factors that have the biggest negative effects on hospital income are claim denials and patient incapacity to pay their part 90% more uncollectible claim denials were written off by hospitals and healthcare systems in 2017 compared to the preceding six years.</li> </ul>

6.	Scalability of the solution	<ul style="list-style-type: none"> <li>• A variety of institutions must store, evaluate, and take action on the massive amounts of data being produced by the health care sector as it expands quickly.</li> <li>• India is a vast culturally varied nation with a sizable population that is increasingly able to access centralized healthcare services.</li> </ul>
